

DYNA-MELT

FAST-ACTING ICE MELT

with purple color application indicator

POWERFUL

Using a blend of chlorides, **DYNA-MELT** is faster and more effective than plain rock salt. Besides being effective down to -20°F, it's also non-corrosive. It's non-toxic to plants and pets and can be used as ice melt for concrete that has been cured. One pound of **DYNA-MELT** has the same melting power as three pounds of rock salt. Keep snow and ice off of your sidewalks and roofing without worrying about stains or damage to the materials. It can be safely used on asphalt, slate, and tin roofing to take care of ice and snow build-up. You'll be using less product overall to melt the same amount of snow and, when used responsibly, it won't mess with the soil of your lawn or garden.

FAST-ACTING

Faster Melting Starts Here. **DYNA-MELT** fast-action, long-lasting ice melter works clean and works fast without causing bigger problems. **DYNA-MELT** allows you and your family to get on with your day as quickly as possible. And we've colored it purple for ease of application without staining.

PET-SAFE

DYNA-MELT is your new best friend. Our ice melter is safer than other leading ice melt products. If your pets happen to take a walk through the ice melt, it is less likely to irritate their paws or cause stomach problems if ingested. Choose the ice melt that is backed by a company that prides itself on its high quality products, with a focus on customer satisfaction, service, and most importantly, safety. Choose **DYNA-MELT**, for peace of mind when using it to melt ice.
